ACTIVE QEPS

THIS MONTH'S HIGHLIGHTS

- **1 Active QEPs** — Enhancement proposals shaping the future of QGIS
- **120 Bug Fixes** — Important fixes merged this month via the bug fix programme
- **19 Key PRs Merged** — Feature and improvement pull requests merged this month
- **41 User Groups** — Active across 39 countries worldwide
- **3 New User Group(s)** — QGIS India User Group, QGIS Armenia, QGIS Algeria User Group

不動産業務でGISを活用しよう！物件調査・エリア分析に役立つユースケースを紹介 - QGIS LAB by MIERUNE

2026-08-19

はじめに物件の周辺環境を調べるために複数のWebサイトを行き来したり、紙の地図やスクリーンショットを切り貼りして資料を作ったりと、不動産の実務では、「位置」に関する情報を集めて整理する作業が数多く発生します。こうした作業を大きく効率化できるのが、GIS（地理情報システム）です。なかでもオープンソースのGISソフトウェア「QGIS」は、ソフトウェア自体にライセンス費用が一切かからず、誰でも今日からイ

Faster Project Creation: Introducing Cloning and XLSForm Imports in QFieldCloud

QGISプロジェクト・データを複数人で共有する方法～ファイル共時に起こりやすい問題と対策～ - QGIS LAB by MIERUNE

2026-08-06

はじめにQGISで作成した地図をほかの人に共有するとき、プロジェクトファイルをメールやチャットで送ったり、共有フォルダに保存したりすることがあります。しかし、受け取った人がプロジェクトを開くと、レイヤが表示されなかったり、地図の一部が欠けていたりすることがあります。また、複数人でファイルを更新しているうちに、データが複製され、どのファイルが最新版なのか分からなくなることもあります。QGISのプロジ

[tell vcpkg we need a fortran compiler](#)

[\[Backport release-4_2\] Make google_fonts.json version of google fonts data](#)

[QgsTextRenderer: avoid to add the vertical offset two times](#)

[\[Backport release-4_2\] Fix add part crash with avoid overlaps](#)

[Remove QgsProject::instance\(\) references from QgsMapLayerModel and QgsMapLayerProxyModel \(QEP 423\)](#)

[Fix error being raised about not being able to convert crs to WGS84 for non Earth crs on project change](#)

[\[Dxf\] Include highlighths when calling GetMap with DXF output](#)

[Fix add part crash with avoid overlaps](#)

[nix: drop not needed src attribute in wrapped package](#)

[\[api\] Move QgsRubberBand::IconType to Qgis, promote to enum class](#)

[Make google_fonts.json version of google fonts data](#)

[Add support for SFCGAL validation engine](#)

[Remove QgsProject::instance\(\) references from QgsMapLayerLegend \(QEP 423\)](#)

[\[Backport release-4_2\] Introduce new QgsVectorDataProvider::renderingSettings api](#)

[Add method to add extra render items to QgsRubberBand](#)

[Introduce new QgsVectorDataProvider::renderingSettings api](#)

[Port 'Execute SQL' algorithm and widget wrapper to c++](#)

[Processing relief creation options](#)

[\[Backport release-4_2\] \[Elevation Profile\] Fix rubberband visibility cases](#)

[\[processing\] Fix crash when algorithm execution fails for non-thread safe algorithms \(Backport\)](#)

[Fix ArcGIS MapServer preview OOM at LOD boundaries \(backport\)](#)

[nix: avoid setting LD_LIBRARY_PATH in Nix package](#)

[Drop unused WidgetWrapper subclass for deprecated raster calculator](#)

[\[Backport release-4_2\] fix\(qgs3dmapcanvas\): Allow key events to be sent to maptools](#)

[\[Backport release-4_2\] \[processing\] Fix crash when algorithm execution fails for non-thread safe algorithms](#)

[Fix QgsVertexId::isValid](#)

[ci: fix labeler indentation](#)

[\[processing\] Fix crash when algorithm execution fails for non-thread safe algorithms](#)

[\[Backport release-4_2\] \[browser\] Fix long ui hang when opening context menu for stac parquet datasets](#)

[Fix crash in simplify tool when switching layers \(fixes #66893\)](#)

[\[Elevation Profile\] Fix rubberband visibility cases](#)

[Bump the all-actions group with 8 updates](#)

[\[Backport master\] Fix crash in simplify tool when switching layers \(fixes #66893\)](#)

[\[Backport release-3_44\] \[fix\] Make sure we only set text/mimeType to the Selection Clipboard, if the system explicitly supports it](#)

[\[api\] Add canvas getter to QgsMapCanvasItem](#)

[Queued ltr backports](#)

Key Merged Pull Requests (5 items)

[tests] Add tests for OBJ and GLTF model textures/color loading

2026-08-12 by ViperMiniQ

This PR adds tests for loading of OBJs and GLTFs, to check that the material color/textures are loading correctly. Light intensity has been increased in order for the PBR material to be better visible. QGIS logo GLTF got by loading the logo OBJ in Blender and exporting to GLTF.

[api] Add method to simplify expressions

2026-08-16 by nyalldawson

Returns an expression which is the simplest direct equivalent of this expression Eg. an expression like `1 + 2` can be effectively replaced by the expression `3`, or `(1 + 2) * a` by `3 * a`. Sponsored by North Road, thanks to SLYR AI tool usage - [] AI tool(s) (Copilot, C

[expressions] Fix lpad/rpad misbehaving with an empty fill character

2026-08-11 by nirvn

Description This PR fixes the lpad and pad expression functions' handling of an empty fill character. ATM, the following expression crashes QGIS on a debug build (due to a Qt assert), and outputs garbage characters on a non-debug build: `lpad('12345', 10, '')` The PR fixes that by making the

Add "sample" as tag for native:rastersampling

2026-08-23 by kannes

Description The tool is called "Sample raster values" in English but other languages might not use the word "sample". The algorithm itself is called `native:rastersampling`. As an advanced user I am used to finding algorithms in localized QGIS by searching for their English terms in the Proces

Introduce new QgsVectorDataProvider::renderingSettings api

2026-08-05 by domi4484

Description General: Introduce new `QgsVectorDataProvider::renderingSettings` api for provider rendering settings. Arcgis rest: - Support layer level transparency - Support for min/max layer scale - Support for scale dependent visibility AI tool usage - [x] AI tool(s)
